NOTABLE PROJECTS

DEVELOPMENT OF THE IE ALUMNI DATABASE

a form-answering webpage to keep track of alumni credentials

CS Internship Midyear 2024

- *HTML-JS-based form on a webpage, connected to a Cloud Firestore database*
- *Editing of data is reserved to the admin or the alumni themselves via Google Auth services.*
- *The admin is capable of querying existing entries for purposes such as data analytics*
- *Database entries can be exported into Google Sheets for back-up and safekeeping*

FUNIKI

an innovative solution designed to optimize your child's sleep environment effortlessly.

University of the Philippines Diliman - Department of Computer Science IoT Cup 2024

- *Wireless control of lighting intensity and color*
- *Remote adjustment of sound playback for soothing music or white noise*
- *Rotation of a nursery toy to provide entertainment and stimulation for the baby*
- *Parental alerts for abnormal environmental conditions or disturbances detected during sleep*

Mostly dealt with a mix of hardware and firmware for the project.
